

Bahrain Radio Type Approval (TRA)

Type approval for telecommunication and radio communication products intended to be marketed in Bahrain is based on TRA's approval.

SUMMARY OF TRA RADIO/TELECOM TYPE APPROVAL PROCESS

Radio frequency transmitter and receiver products intended to be marketed in Bahrain that make use of the radio spectrum or connect to the public network are subject to a mandatory approval process issued by the Telecommunications Regulatory Authority (TRA).

TRA compliance testing activities with technical requirements are based on 2014/53/EU RED test reports. Moreover, an EU-Type Examination Certificate must be part of the technical documentation submitted to the TRA.

Once equipment type testing has been performed, a Bahraini supplier must apply for the TRA certificate of approval by providing the required documentation. This application must be submitted through TRA's official e-mail address. The TRA certificate has a 3-year validity period.

TRA PRODUCT MARKING

There are no specific product marking requirements for TRA's Type Approval.
